

The Busy Bees had a wonderful month of March learning about Outer Space and the scientific method. The first week of April we will explore our unit “Learn Everyday about Art”. As we experiment with different art mediums the children will be getting messy! Please send them in clothing that is ok to get dirty. April showers bring May flowers! Or, as far as the Busy Bees are concerned, they will hopefully bring lots of veggies and herbs! Throughout the month of April, we will be focusing on the life cycle of plants and what things we are able to grow. Our family planting day will be Friday April 19. Each year we watch the weather throughout the week and if needed we will have a rain date scheduled for early May. We look forward to planting with you all!
