

Hello Summer!

May was a very exciting month for the busy bees as we learned all about bugs. They were very hands on and even were able to watch our caterpillars transform into butterflies! we are now learning about different types of rocks, caves, and crystals. We will be creating our own crystals, going on walks to explore all of the rocks North Aurora has to offer as well as experimenting with volcanoes! With the weather being cold in the morning and hot in the afternoons we are asking you to please bring a light jacket with your childs name on so they can wear it in the morning and if you do not have sunscreen here already for your child please bring that as well since summer is here the UV is very high in the afternoons!

Special days!

Yasir's Birthday June 11

Flag day / MOKA DAY! - June 14

Fathers day! - June 16

Juneteenth - June 19
